CARE AND CLEANING

- To maintain the beauty of the finish, avoid placing the furniture in direct sunlight, as sunlight causes fading. Also avoid extreme changes in temperature by arranging furniture away from radiators, heat and air vents, and air conditioning units. Avoid placing furniture directly under windows.
- Dust the vanity frequently with a clean, soft, dry or lint-free cloth. Clean the surface by rubbing in the direction of the grain using damp lint-free cloth. Avoid using silicone cleaners and waxes.
- Clean up excess water and spills immediately. Use blotting rather than a wiping action. Water left over a long period of time will cause white spots in the finish. Please note that some chemicals may damage the finish.
